CLOSE OF THE WAR IN NORTH CAROLINA -The Grant Holden-Kirk war in this State has nearly closed. All the companies of United States artillery sent here by President Grant, under the false representations of Holden, Pool and Settle, lefe last Friday on their return to Fortress Monroe. Only one com-pany of United States infantry remains.— All of Holden's troops are gone also, ex cept a few negroes at the arsenal, Burgin, who is in jail, and Kirk, who is in the marshal's custody. Some of the melish that were disbanded have arrived at their homes in Tennessee and other places; the remainder are in the different jails of the State. On Friday the quartermaster's stores of Holden's army were sold in this city at public auction. The horses sight his which cost in the aggregate \$2,800, sold for \$1,820; the other things, we learn, eame near bringing their value, considering the manner in which they were abused during the cam-paign.—Raleigh Sentinel.

Dr. M. Bernhardt, Oculist and Optician:

My Dear Sir: I beg to express to you the deep sense of obligation I feel for the professional kindness extended to me, by which, with eye sight impaired by years of application and study, I am enabled to write this note with the clearness of vision which I enjoyed in the days of my youth. May your honorable and useful life long be spared, that humanity may enjoy the scientific skill of one so eminently qualified in mind and heart to do good to his fellowmen. With grateful acknowledgments, permit me to subscribe myself,

adapted to my eyes than any I have ever used. The facilities with which you fitted the glass to my eye furnished me conclusive evidence of your thorough experience as an Oculist. Your attainments in your profession entitle you to the confidence, patronage and gratitude

Portsmouth, Va., Dec. 1, 1865. Prof. Bernhardt :- I owe you a debt of gratitude for the benefit you have rendered me. Improved in QUALITY AND CONDITION.
The quality of this Guano is materially improved this season by the addition to its composition of a large per cent of the SALTS OF POTASH.

It is improved in condition by being brought into market sufficiently dry and uniformly fine to pass with facility and regularity through the orifices of the WHEAT DRILL.

BY THE RADIANT BASE-BURNING

STOVE. The great and leading features which distininguish the Radiant Stove from all other Base Burners is the peculiar construction of the magazine and the arrangement of the same with the fire pot. Among the advantages gained I will enumerate-

1st. The total preclusion of the possibility of explosion, the magazine being to constructed and perfected that instead of the gasses being collected and retained therein, they are conveyed to the fire where they are consumed and thus producing greater economy in the consumption of fuel and increased power of radiating heat. 2d. Largely increased fire surface for illumi

nation and radiation by the magazine, inclining from the front of the top of the stove to the back of the fire pct. 3d. The removal of all impediments to the free combustion of the fire by relieving it of the whole of the pressure of the coal in the maga-

zine. 4th. The non-ignition of the coal in the mag-azine—it being placed beyond the reach of the intense heat of the fire—and thus really giving us a magazine to hold coal instead of a vertical retort in which all the gasses of the coal are being distilled and wasted by being either conducted to the chimney or allowed to accumulate 1.50 till unfortunately exploded, involving consequences not unfrequently of a serious and painful character.

5th. Simplicity of operation-merely requir-ing the fire to be started as in any ordinary stove, after which the magazine can be supplied with coal according to the length of time for which the fire may be desired. 6th. Durability radient; in the parts surround-

ing and exposed to the fire, being made extra Each one of these stoves will be sold at New York retail price. Also a large assortment of Cooking Stoves,
